Document Camera (Toshiba TLP-C001)-

- I learned that it's supposed to have a **remote!** I didn't know that.. and I definitely don't have one.
- Also: Toshiba document cameras and projectors are generally only compatible with other Toshiba's.

DLP/LCD Projector (Toshiba)

- I also found out that I have a DLP. Most likely, it doesn't need it's filters changed, at least according to the article.
http://www.projectorcentral.com/lcd_dlp_comparison.htm?page=DLP-Advantages
- My Toshiba also likely doesn't have keystoneing, but I'm going to check.

Laptop

- Question: On my Dell Laptop- I have black lines on the edges when using certain software. I looked, but didn't find a definitive answer.

I will have to find more model numbers of the hardware before I can find the owner's manual..
